

# MECHA EAGLES SPONSORSHIP PACKAGE

BAJA SAE OFFROAD AT BOSTON COLLEGE

**2026-2027**

MECHA

# Mission & About

## Mission

Our mission is to provide hands-on engineering experience that mirrors industry practice, emphasizing reliability, manufacturability, and performance under real-world constraints.

Through the complete design-build-test cycle, MechaEagles equips students with practical skills in mechanical design, systems integration, project management, and technical communication, preparing members to transition confidently from the classroom to industry.

## About Us

MechaEagles is a student-led engineering team at Boston College, founded in 2024, that designs, manufactures, and competes in a single-seat off-road vehicle in Baja SAE. Our members gain hands-on experience across the full design-build-test cycle under real-world constraints.

Our vehicle is evaluated through design reviews, cost analysis, dynamic events, and a multi-hour endurance race, where reliability and execution are critical. With a standardized engine, Baja SAE emphasizes engineering decision-making over raw power, providing experience directly applicable to careers in engineering and manufacturing.

# Institutional Momentum

## Engineering at Boston College

Boston College has made major investments to expand its engineering education, including the launch of its first undergraduate engineering degree and the construction of more than $300 million in new science and engineering infrastructure. This includes the 150,000-square-foot integrated science and engineering facility at 245 Beacon Street, which houses collaborative labs, maker spaces, and design studios supporting applied, project-based learning.

As the engineering program continues to grow, student-led technical organizations like MechaEagles play a critical role in translating this institutional investment into hands-on engineering experience.

## Why Support?

MechaEagles serves as a central pillar of Boston College's novel engineering community, providing hands-on experience in design, manufacturing, and systems at a scale unmatched by other technical organizations on campus. The team operates as a professional engineering organization, integrating technical development, operations, and business execution under real-world constraints.

As Boston College's engineering programs grow, MechaEagles is positioned to become a unifying organization that supports, coordinates, and elevates applied engineering efforts across campus. Sponsorship of MechaEagles is an investment not only in a competitive Baja SAE team, but in the long-term foundation of engineering education and technical leadership at Boston College.

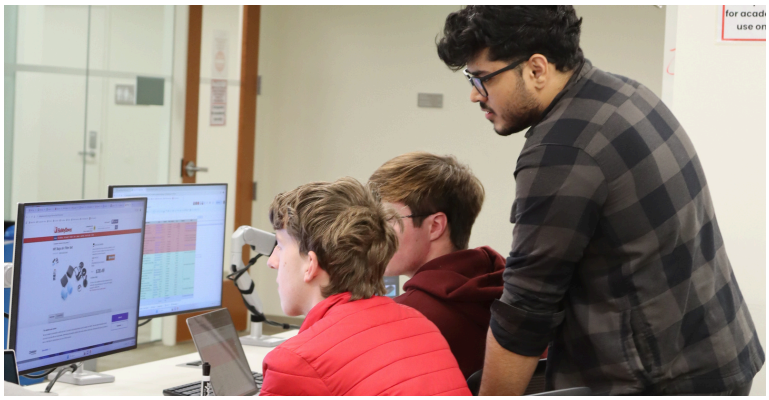

**"There is a level expectation, but also genuine excitement that there is something really new here and something that is going to make an impact, both on campus and in the world." - Boston College**

# Events & Student Benefit

## What we Do

- Car shows and Meets
- General Body Meetings
- Networking & Guest Speaker Events
- Movie Nights
- Collaborate with Other Clubs
- Technical & Professional Workshops
- **COMPETE** in local and national races

## Student Benefit

MechaEagles provides students with an immersive engineering experience that extends far beyond the classroom. By participating in the full design-build-test cycle, members develop practical skills in mechanical design, systems integration, budgeting, and project management under real-world constraints. Students learn to operate within deadlines, defend technical decisions, and collaborate across disciplines—mirroring the expectations of industry. Through competition, sponsor engagement, and hands-on manufacturing, MechaEagles prepares its members not only to graduate as engineers, but to lead as professionals.

MECHA

# Donation Levels

We are currently prioritizing **In-Kind** foundational relationships with industry leaders

## Bronze - **$250+** or equivalent in products/service

- Organization and Project Updates
- Company Name on website
- Logo on website sponsor page with hyperlink
- Social media shoutout (2-3 times per year)

## Silver - **$500+** or equivalent in products/service

- All Bronze benefits
- Small logo on T-Shirt
- Tagged social media recognition during competition season
- **Access to Resume Book**
- **Option for info session with MechaEagles to promote your company to students at Boston College**

## Gold - **$1,000+** or equivalent in products/service

- All Silver benefits
- Small logo on competition Vehicle and Team T-Shirt
- Banner Displayed at Competition Pit

## Platinum - **$3,000+** or equivalent in products/service

- All Gold benefits
- Priority logo placement on competition Vehicle and Team T-Shirt
- Priority recruiting access
- Opportunity to deliver a presentation at one of our general meetings
- Option to display car at the company
